Ahmed Waheed Mostafa

Junior Flutter Developer

ahmedwaheed4047@gmail.com | +20 114 823 4944 | linkedin.com/in/ahmed-waheed11 | github.com/ahmed-waheed1 | Egypt

CAREER OBJECTIVE

Motivated Junior Flutter Developer seeking an entry-level mobile development role to build clean, responsive cross-platform applications with Flutter and Dart. Eager to apply hands-on experience in state management, Firebase, REST APIs, and clean architecture — backed by the ALX Software Engineering Program and a Flutter Core Team role at Google Developer Groups on Campus — to deliver high-quality apps while continuing to grow as a developer.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Cross-Platform Development, State Management (Bloc, Provider, Riverpod)

Architecture & Patterns: Clean Architecture, MVVM, Design Patterns, Object-Oriented Programming

Networking & APIs: RESTful APIs, Dio, http, Retrofit, WebSockets / Socket

Backend & Cloud: Firebase (Authentication, Cloud Firestore, Realtime Database), Payment Integration

Databases & Storage: SQLite (Drift), Hive, SharedPreferences

On-Device ML: Google ML Kit (Pose Detection), Camera / Live Image Streaming

Programming Languages: Dart, C, C++, Bash / Shell Scripting

Tools & Practices: Git, GitHub, Linux, VS Code, Unit & Widget Testing, Problem Solving, Data Structures & Algorithms

Currently Learning: React, Redux, Tailwind CSS, Django

EXPERIENCE & TRAINING

ALX Software Engineering Program | Feb 2023 – Feb 2024

ALX Africa — Intensive 12-month full-stack software engineering program

- Selected from thousands of applicants for the competitive 12-month program, working through an intensive, project-based curriculum covering low-level programming in C, shell scripting, system engineering, and DevOps.
- Contributed to open source during Hacktoberfest 2023, collaborating with the global developer community.
- Strengthened core computer-science skills, including data structures, algorithms, Linux, and version control with Git.

Mobile App Development — Digital Egypt Youth Program | Feb 2025 – Mar 2025

National Telecommunication Institute (NTI), Ministry of Communications and Information Technology

- Earned a 98% final score across 90 technical hours and 30 freelancing-coaching hours of mobile application development.
- Designed and delivered hands-on mobile app projects with a focus on practical, client-ready development.

Flutter Core Team Member — GDG on Campus Zagazig | 2023 – 2025

Google Developer Groups on Campus (formerly GDSC), Zagazig University

- Selected for the Flutter Core Team for the 2024–2025 academic year, after serving as a Flutter track member in 2023–2024, helping organize and deliver the chapter's Flutter sessions and activities.
- Engaged with the student developer community and supported peers through tech talks and tutorials on Flutter and Dart.

PROJECTS

Full source code available on GitHub: github.com/ahmed-waheed1

Body Lens — On-Device Posture & Body Analysis | github.com/ahmed-waheed1/body_lens
Flutter, Dart, Google ML Kit (Pose Detection), Camera, Riverpod, Clean Architecture

- Built a computer-vision app using Google ML Kit to detect 33 body landmarks fully on-device, rendering a real-time skeleton overlay from both photos and a live camera feed.
- Derived body measurements, a 0–100 symmetry score, and posture issues (shoulder/hip tilt, trunk lean, head misalignment) from the detected landmarks.
- Architected the app with clean architecture and use cases, a sealed failure hierarchy, and a Result type for error handling, with analyses auto-saved to local history.

Spendly — Personal Budget & Expense Tracker | github.com/ahmed-waheed1/spendly
Flutter, Dart, Riverpod (code generation), Drift (SQLite ORM), go_router, fl_chart

- Built an offline-first budgeting app with per-category budgets, 80% spending alerts, and pie/bar spending charts, with data exportable to CSV and PDF.
- Engineered a clean three-layer architecture (presentation / domain / data) backed by a type-safe Drift SQLite database and code generationerated Riverpod state management.
- Implemented full English and Arabic localization with automatic right-to-left layout, theming, and local notifications.

Rootine — Habit Tracker & Streak Analytics | github.com/ahmed-waheed1/rootine
Flutter, Dart, Riverpod (code generation), Hive, go_router, fl_chart, flutter_local_notifications

- Developed a fully offline habit tracker with daily check-ins, current and longest streak logic, a weekly bar chart, and a 30-day completion heatmap.
- Designed a pure-Dart streak calculator covered by unit tests, with repositories tested via in-memory Hive and widgets via Riverpod overrides.
- Added scheduled local notifications that auto-reschedule after device reboot, plus customizable habit icons, colors, and target days.

ALX Software Engineering Projects | github.com/ahmed-waheed1
C, Bash / Shell Scripting, Linux

- A collection of low-level programming projects in C and shell-scripting projects covering data structures, algorithms, system engineering, and DevOps.

CERTIFICATIONS

- **The Complete Flutter Development Bootcamp with Dart** — Udemy, Dr. Angela Yu (2026, 29 hours)
- **Mobile App Development** — Digital Egypt Youth Program, NTI (2025, Score 98%)
- **Software Engineering Program** — ALX Africa (2024)
- **Flutter Core Team — Certificate of Completion** — Google Developer Groups on Campus, GDG Zagazig (2024–2025)
- **Flutter Member — Certificate of Appreciation** — Google Developer Student Clubs (GDSC), Zagazig (2023–2024)
- **Cybersecurity Workshop** — IEEE Cairo University Student Branch (CUSB)

EDUCATION

Bachelor of Computers and Information | 2022 – 2026
Faculty of Computers and Information, Zagazig University, Egypt

LANGUAGES

Arabic (Native) **English** (Professional Working Proficiency)

ADDITIONAL INFORMATION

Military Status: Exempted
